

As director of a non profit agency, I urge you to provide for an exemption for non profits with an existing relationship to send and recieve a FAX without requiring prior permission. We do receive a lot of unrequested faxes at our office, but these are most often from for-profit entities, not our establishe nfp contacts. This planned change will burden agencies like our's and those with whom we work and depend upon for professional guidance, such as the NC Center for Non Profits. Thank you.
